2. The application has been amended as follows:

In the claims:

Claim 3, line 6: "the distortion compensation processing using this distortion" has been changed to "a distortion compensation processing using the distortion".

3. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest, alone or in a combination, among other things, at least a distortion compensating apparatus for compensating for distortion of a transmission power amplifier and its method as a whole, the combination of elements and features as claimed, which includes a comparator for comparing power of the transmit signal output from the predistortion unit and an upper-limit power before the calculated distortion compensation coefficient is stored in the memory; and a distortion compensation coefficient updating unit updating the corrected distortion compensation coefficient when the transmit signal is greater than the upper-limit power; updating the calculated distortion compensation coefficient when the transmit signal is

less than the upper-limit power; and a limit-surpass detector detecting the transmit signal from the output of the predistortion unit having surpassed a limit level, and an amplitude controller controlling the amplitude of the feedback signal when the limit level has been surpassed.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
